SITEMAP

OVER PLANNING & RESEARCH

PROCESS: WIREFRAMES

MOBILE FIRST

< 640 px

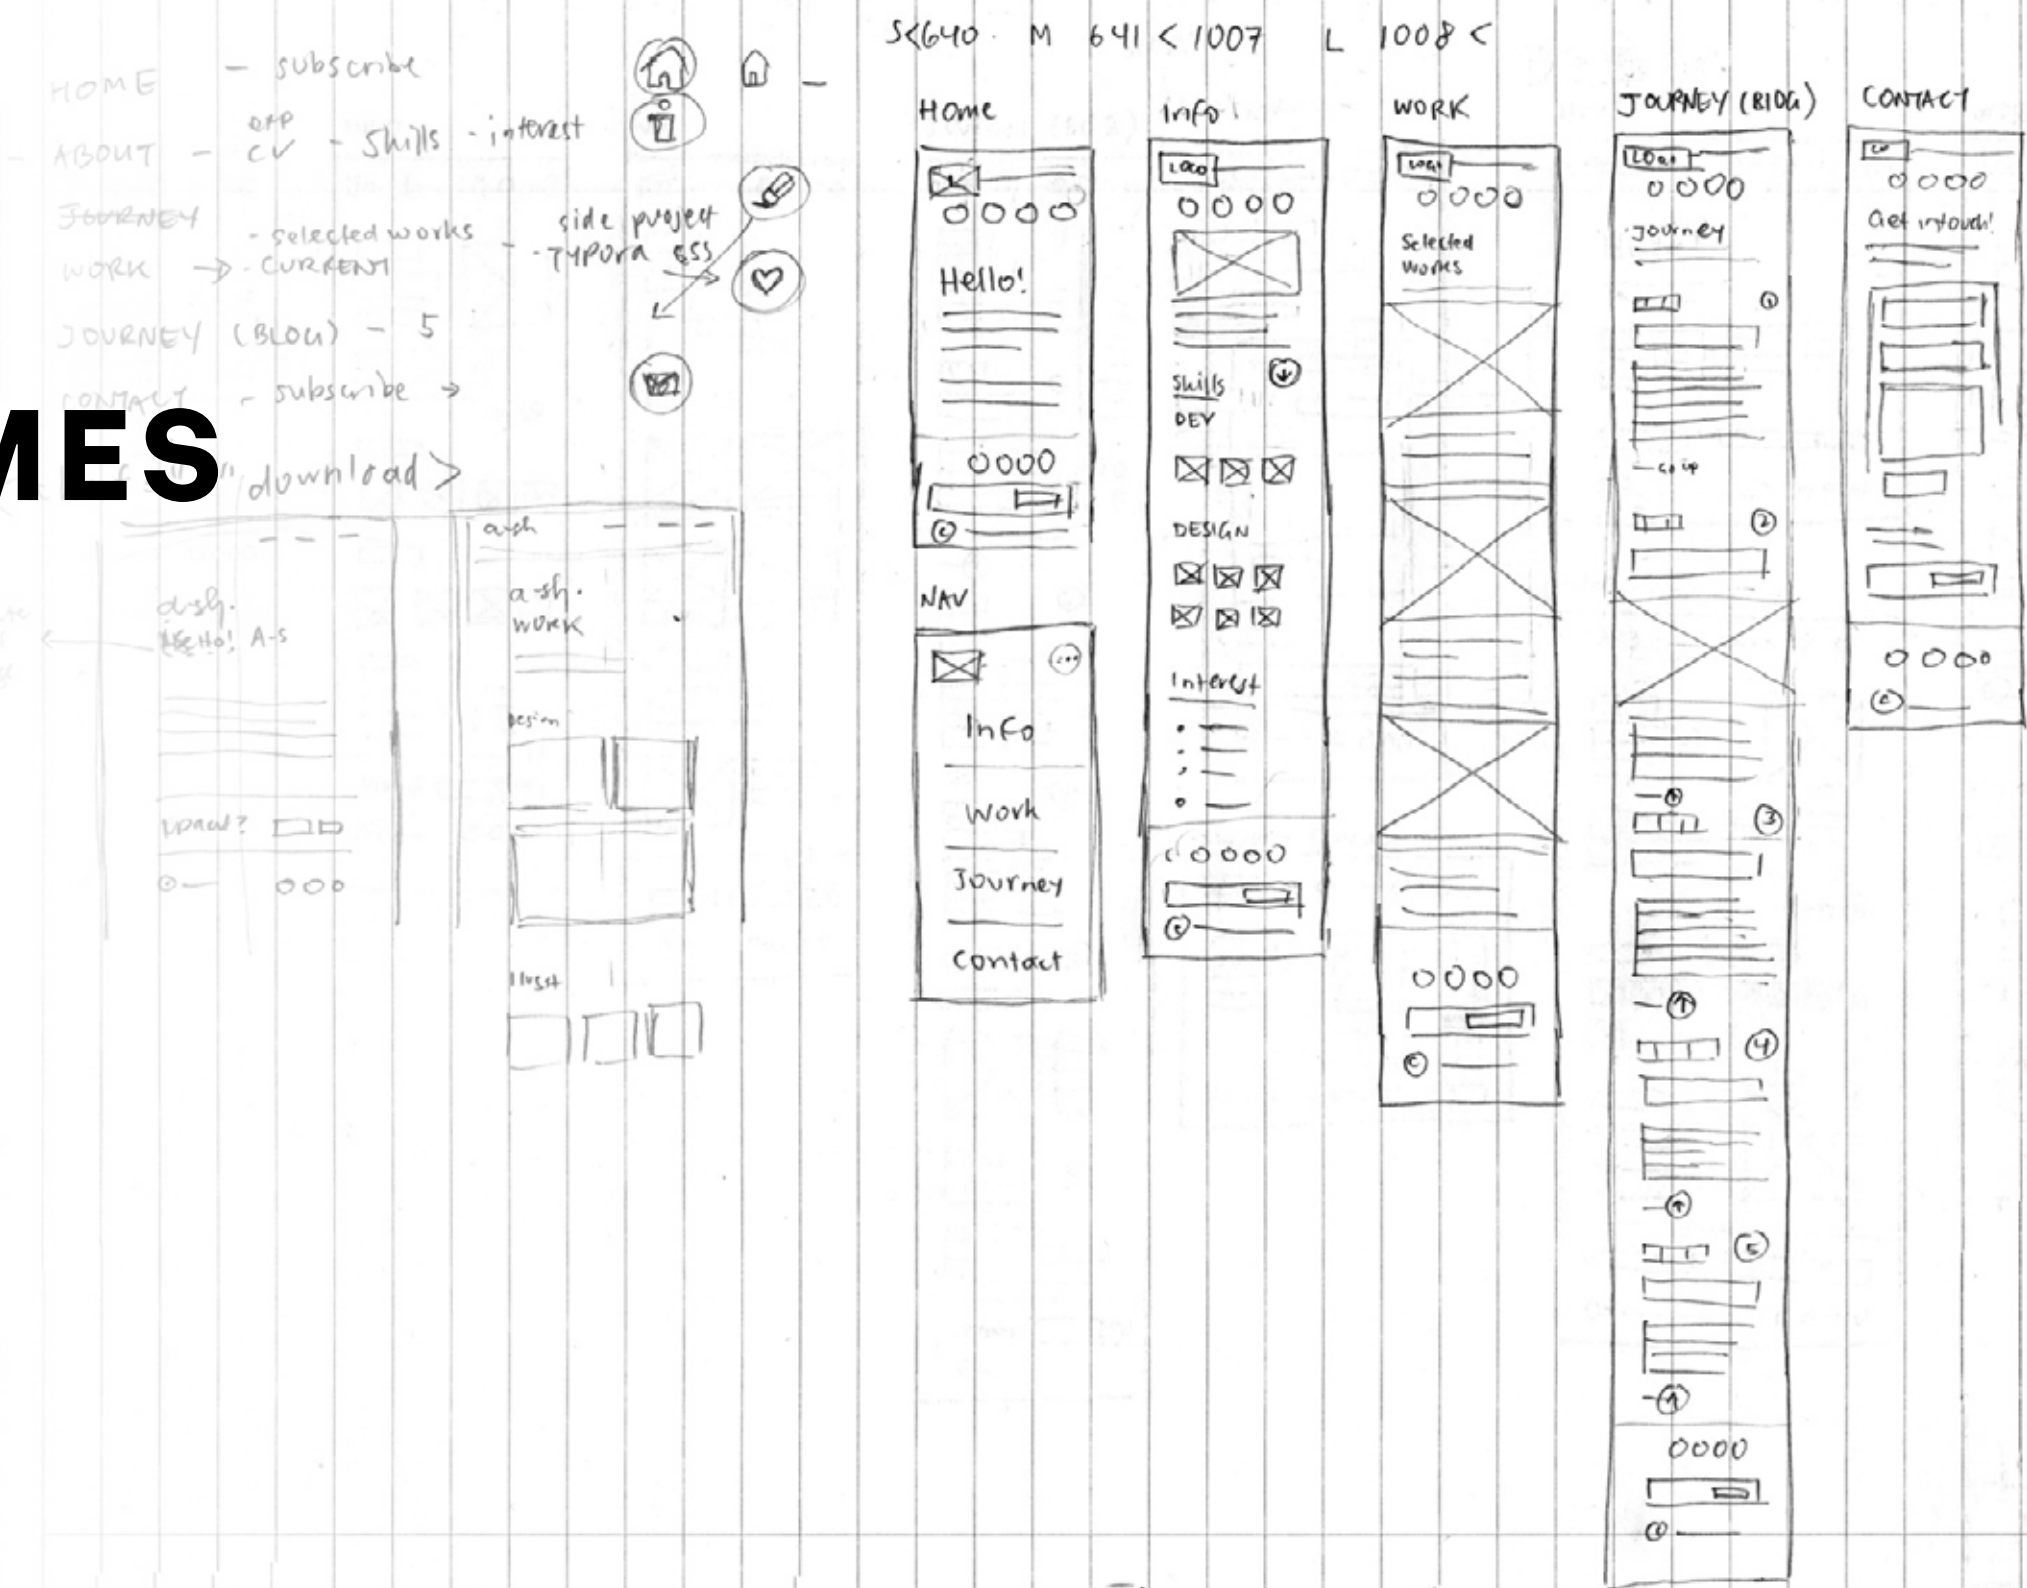

TABLET

641 px < 1007 px

DESKTOP

1008 px <

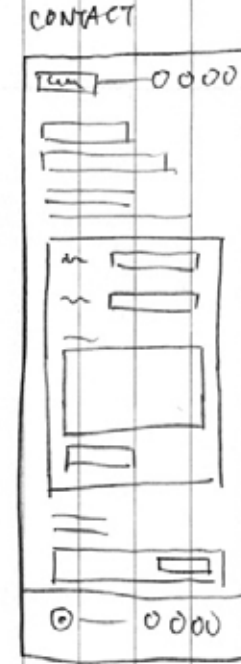

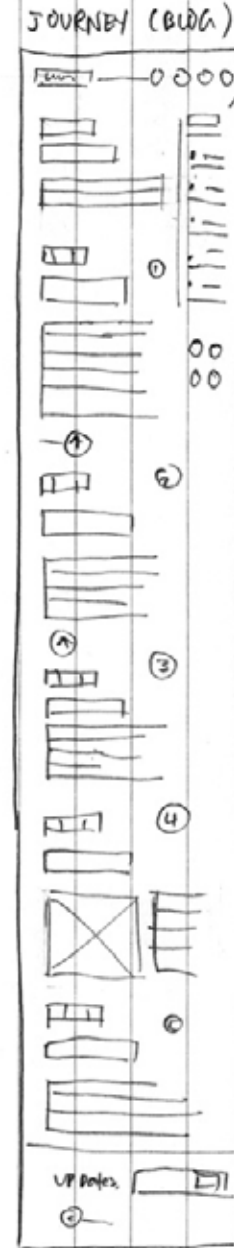

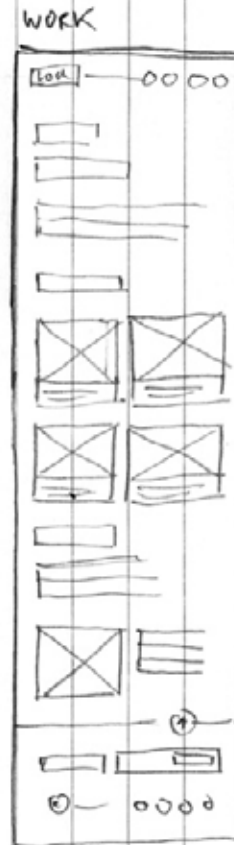

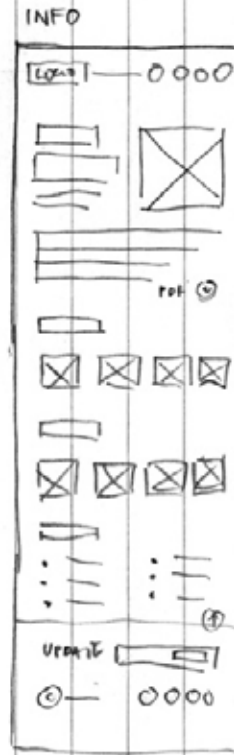

Components:

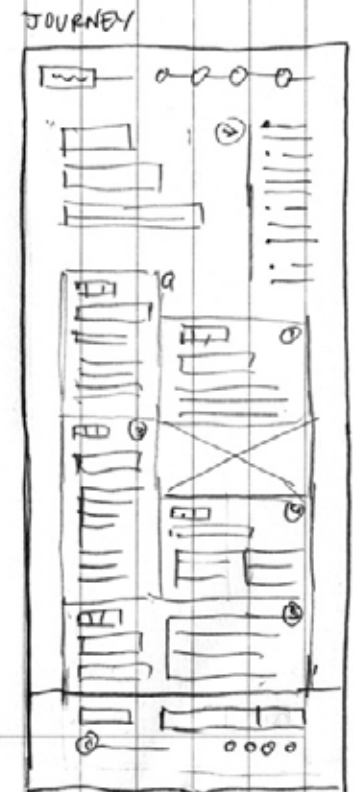

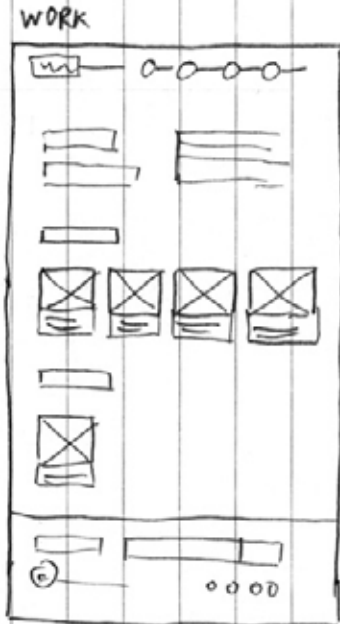

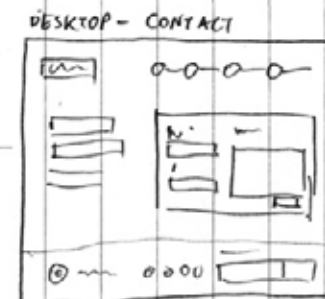

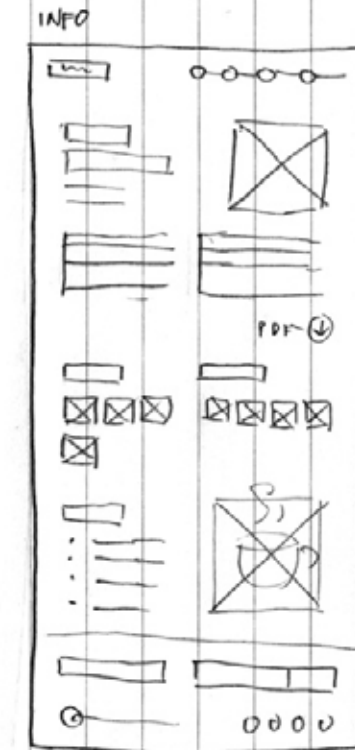

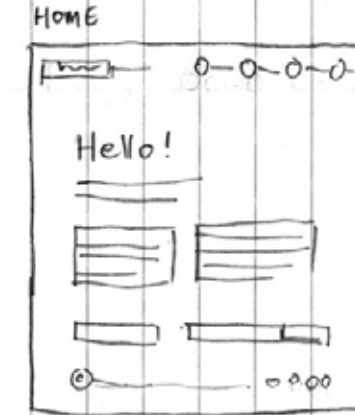

- Sticky navigation for better accessibility
- Simple light interface transition to give some interactivity
- The use of soft and pastel colours – more friendly for eyes. The design style is also minimalistic and clean to be more inviting and not overwhelming users with a lot of information.
- Secure contact form

PROCESS: WIREFRAMES

TABLET

DESKTOP

PROCESS: DESIGN

Typography

- Two google fonts, with san-serif font as the primary and monospace font for secondary or supporting font.

Colour Theme

- Pastel soft colours

Graphical Elements, Illustration

- Things that I like
E.g: cloud, tea

PRIMARY TYPOGRAPHY

Work Sans

Aa Bb Cc Dd Ee
Ff Gg Hh Ii Jj

Lorem ipsum dolor sit amet, consectetur
adipiscing elit. Curabitur pretium erat in
leo consequat maximus.

SECONDARY TYPOGRAPHY

Space Mono

Aa Bb Cc Dd Ee
Ff Gg Hh Ii Jj

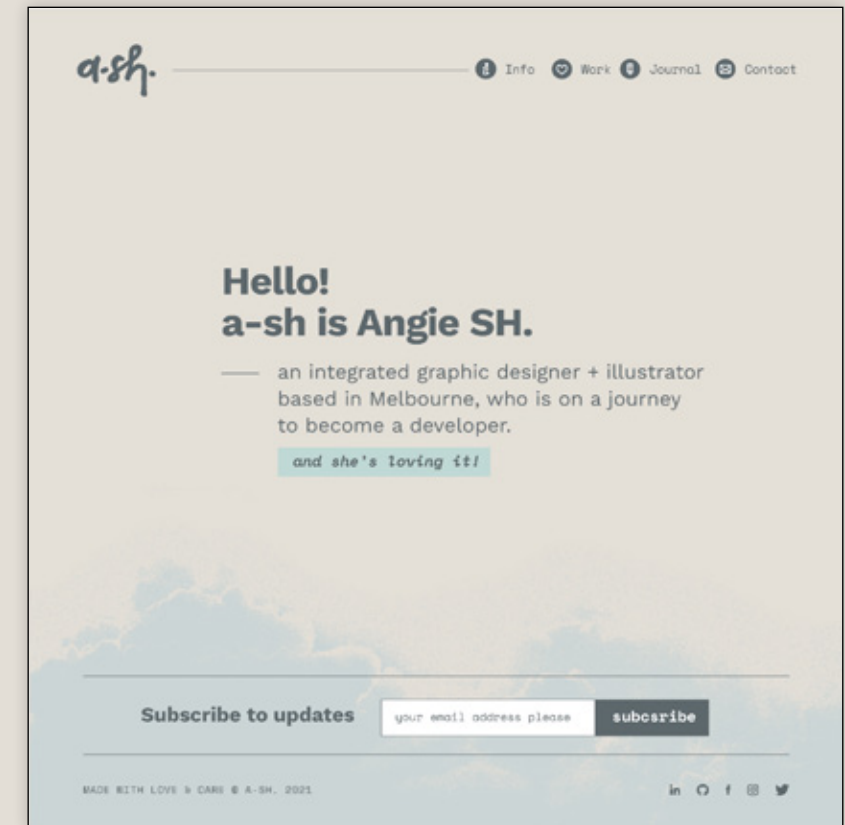

Lorem ipsum dolor sit amet, consectetur
adipiscing elit. Curabitur pretium erat
in leo consequat maximus.

PROCESS: DESIGN —MOCKUP

High-fidelity mockup

- If time allowed, I would made mockup of all pages to give me better blueprint in developing the website
- On the next slide, I use the mockup to give me insights on constructing the flex and grid layout as I style the css. Also helps to organise the scss naming. I use BEM and nesting regularly.

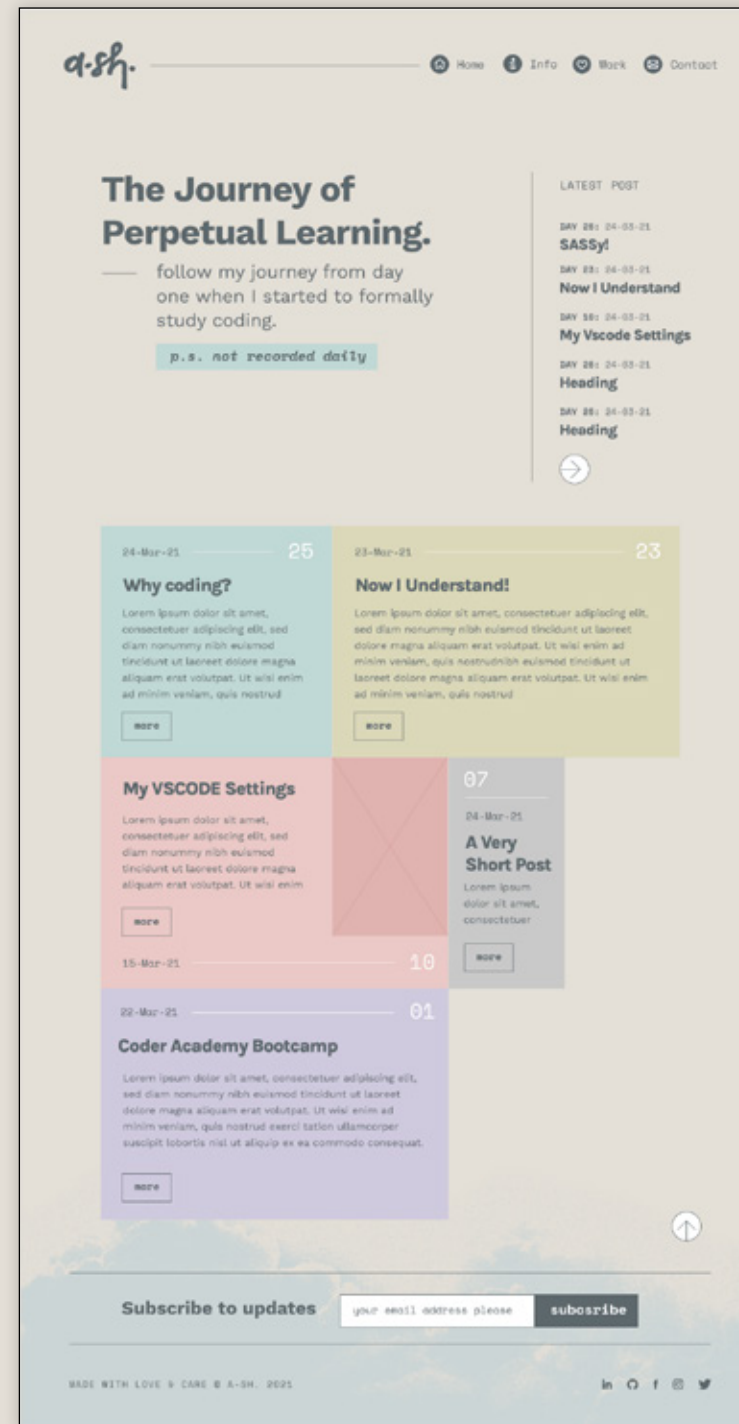

PROCESS: DESIGN —MOCKUP

IDEALLY...

... the finished work looks exactly like the mockup...

- After going through the coding and developing process, I now gain more respect towards developers. Developing an actual website is a lot more challenging than designing it on design programs!
- Ideally the journal posts section should have dynamic size and positioning as supposed to only have uniform square size.

DEVELOPMENT / BUILD PROCESS

CHALLENGES

- Based on personal experience (being a perfectionist), I have to think more as a developer, functionality over aesthetic, and stay focus with the plan (not adding more features and so on that eventually waste time
- Hope to be able to 'develop' this project overtime, hence, being a developer
- Need to allow room for growth, the project to be evolving, and...
- IT DOESN'T HAVE TO BE PERFECT!!
(*especially right now...*)

EXPERIENCE

- The knowledge as a developer really help in the design process.
- Definitely able to empathise with developers! – *not everything has to be pixel perfect!*
- Ethical issues, privacy concern for displaying personal contact details

FAVOURITE PARTS

- When everything *finally* works!
- Discover new things about CSS/SASS to be implemented

THANK YOU

ANGELINE HENTRI – (ANGIE SH)
